En su Despacho

According to your letter received after the TCC13 that was held on September 27 to October 3 of 2017, please find enclosed additional information, to comply with all the sustainable measures established by the Commission for all the CMM Is and Cooperating Non-Parties.

Ecuador has been working hard on collecting the information generated by fishing vessels carried out their activities during 2016 as well of all legislation and international conservation measures, to fully cooperate with the Commission. We apologize for delay response, due to the vast translation work of documents we have done.

The information is detailed by resolution number and its support documents attached.

We hope that with this additional information, Ecuador, fully complies with WCPFC Conservation and Management Measures.

We are looking forward for your comments and any request for any additional information

Best regards,

Atentamente,
