

**International VMS Conference
Brisbane, Australia
29-30 March 2007**

The WCPFC Vessel Monitoring System will be showcased at an International VMS Conference to be held at Brisbane, Australia from 29-30 March 2007. The most recent in a series of such conferences held in different international locations, this WCPFC Secretariat-endorsed International VMS Conference will bring together VMS technology providers and practitioners to discuss the latest vessel tracking and electronic logbook equipment, and its potential application in the western and central Pacific Ocean region.

Further information about this forthcoming conference will be made available on this website as it comes to hand.
